Attachments: HPNS abstract+ys.docx

Thank you for sharing, Wayne. I have some comments and suggested edits. In general, I suggest being more specific to the work being the Navy's to do. Also, I recommend to further explain the phased approach that starts with 33% and might test more, if certain conditions are found. Should we box the language into the next phase being triggered if "remedial goals" are exceeded?

FYI – I know Lily has some past presentations on the site with pictures and timelines. I believe she has a Sharepoint site with those presentations and may have shared them with you in the past.

Yolanda

Subject: draft abstract

Brianna - Stuart Walker asked for an HPNS abstract for his radiation conference to be held sometime next year. Any concerns/corrections?

Yolanda – If you have time to take a look, I'd appreciate your input.

Thanks.
